

# Introducing three new ways for finding online orthopaedic resources

## Orthopaedic Web Links

The Gateway to the Orthopaedic Internet

### OWL Directory

validated and peer reviewed to ensure interest to orthopaedic surgeons, patients, and allied health professionals.

### OWL Web Search

get better, more relevant search results from your Google searches.

### OWL Meta Search

search the most popular engines including Google, Yahoo!, MSN, Ask and more, and returns the best results from each.

### Have You Discovered OWL?

- OWL is the largest index of online information for orthopaedic surgeons, residents, nurses, patients, vendors and allied health professionals interested in orthopaedic surgery and trauma.
- OWL is a free, web-based resource designed to help you find online orthopaedic information quickly and easily.
- OWL resources are validated and peer reviewed to ensure interest to orthopaedic surgeons, patients, and allied health professionals.
- OWL is also a community of people like you, who strive to provide an authoritative directory of orthopaedics.

### Visit [www.orthopaedicweblinks.com](http://www.orthopaedicweblinks.com)

- **One of the most trusted institutions that collects and distributes online orthopaedic resources is now even better!**
- Register and become an active member of the OWL community
- Add your website, lectures, presentations, cases, events or any orthopaedic resource

### More improvements:

- **OWL Ask:** Ask OWL Editors to find orthopaedic information on the Internet.
- **OWL Exchange:** Ask for help, share your experience, or exchange ideas.
- **OWL Lists:** Orthopaedic mailing lists archived by OWL.
- **OWL Directory Submit:** Learn how OWL can help businesses, clinics and institutions like yours maximize return with targeted Internet marketing.
